

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Plymouth School District				
General Biology				
Curriculum Goals: Grade 10				
Standard 1.1 (Characteristics of Life) All students will gain an understanding of the structure, characteristics and basic needs of organisms and will investigate the diversity of life.				
Upon completion of General Biology the following objectives will be achieved by 70% of the students with 70% accuracy.				
Objective	Content	Activities	Materials/Resources	Assessments
A. The cell is the unit of life. Students will be able to relate the structure of molecules to their function in cellular structure and metabolism.	1. All organisms are composed of cells. Its multi-cellular organisms, specialized cells perform specialized functions. Organ and organ systems are composed of cells and function to serve the needs of cells for food, air and waste removal. The way in which a cell's function is similar in all living organisms.	Chapter 2.2, 2.4, 2.6, 2.7 History of a Cell Building macromolecules Chemical Reactions and Enzymes Laboratory Activities	Textbook—Prentice Hall; Miller & Levine "Biology" Supplies—Computers, printers, teacher-created handouts Laboratory Reports	Chapter Quizzes Chapter Tests Unit Tests Cell Model Project Laboratory Reports Concept Illustrations
2. Cells carry out the many functions needed to sustain life. They grow and divide, thereby producing more cells. Foods used to provide energy for the work that cells do and a source of the molecules building blocks from which needed materials are assembled.	2. Cells carry out the many functions needed to sustain life. They grow and divide, thereby producing more cells. Foods used to provide energy for the work that cells do and a source of the molecules building blocks from which needed materials are assembled.	Osmosis & Diffusion Activity Levels of Cellular Organization Autotrophs vs. Heterotrophs	Computer Lab—Internet resources exploring various cellular functions & structures.	Verbal Presentations of Materials Power Point Demonstrations of Related Cellular Procedures
3. Living systems are made of complex molecules (including carbohydrates, lipids, proteins and nucleic acids) that react.	3. Living systems are made of complex molecules (including carbohydrates, lipids, proteins and nucleic acids) that react.	What's the Big Deal about ATP? The Reactions of
