#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Unit 7 Worksheet
Part 1: DNA structure and Replication; pg
185-189 Due in class on November 14!

1. What does the word DNA stand for?

2. DNA is a **polymer**, which means that it is made many repeating single units (**monomers**). What are the monomers called?

3. There are 4 different variations of these monomers (different bases), what are those?

4. The base _____ pairs with _____. The base _____ Pairs with _____. This is called **complementary base pairs**. Thus one strand of the DNA is complementary to the other strand (opposite/matching).

5. Based on this base pairing system, which of the following is/are true?
a. Cells contain the same amount of T as A
b. Cells contain the same amount of C as G
c. Cells contain the same amount of T as G
d. Cells contain the same amount of A as C

6. One strand of DNA faces the opposite direction of the other strand. This is called _____. DNA is a double stranded molecule. It looks like a ladder with two sides. This double stranded molecule is coiled (rotated) in a helical manner (like a spring or a slinky, or a spiral staircase). Because of these two properties (2 strands which are coiled in a helical shape), DNA is said to be a _____.

7. DNA is in the _____ of cells. DNA contains information to make _____ which are responsible for all activities in the cell. So the primary function of DNA is to store and transmit genetic information. The bases of DNA are linked together by intermolecular forces (forces between molecules) that are called _____. This is a _____.
