

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Reteach  
Triangle Congruence: ASA, AAS, and HL

**4-5**  
Angle-Side-Angle (ASA) Congruence Postulate

If two angles and the included side of one triangle are congruent to two angles and the included side of another triangle, then the triangles are congruent.

AC is the included side of  $\triangle A$  and  $\triangle C$ .  
DF is the included side of  $\triangle D$  and  $\triangle F$ .

$\triangle ABC \cong \triangle DEF$

Determine whether you can use ASA to prove the triangles congruent. Explain.

- $\triangle ACB$  and  $\triangle BPA$
- $\triangle EFG$  and  $\triangle XYZ$
- $\triangle AMB$  and  $\triangle PMB$  given that  $M$  is the midpoint of  $AB$ .
- $\triangle RTW$  and  $\triangle TVR$
