

Download File PDF Piping Code Asme B31 Zpipe

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

PETROSYNC
ASME B31.3
Process Piping Code Design Requirements
Improve Your Piping Knowledge and Skill by Learning Practical Things From The Expert!

14th - 18th March 2016 at Kuala Lumpur, Malaysia | 25th - 29th April 2016 at Bandung, Indonesia
01st - 05th August 2016 at Kuala Lumpur, Malaysia | 21st - 25th November 2016 at Bandung, Indonesia

Petrosync Distinguished Instructor
Mandar Mulay

- 15 years hands on experience in design and integrity assessment of Piping Systems, Pressure Vessels, Reaction and Storage Tanks.
- Well versed with the major industry codes & standards such as ASME B31.1, B31.3, B31.4 and B31.8, ASME Sec. VIII, Div. 1, 2, 3, TEMA, API 650, 653, 660, 675, etc.
- He has conducted Training Courses (ASME B31.3 Piping Code, ASME Sec. VIII, API 570) in Saudi Arabia, Qatar, Bahrain and UAE for engineers from companies like Saudi Aramco, SABIC, group of Companies, Qatar Petroleum, ADNOC, BAPCO, Gulf Petrochemicals.

Course Objectives

- Familiarize participants with the organization and intent of the B31.3 code
- Know how to read the code, and interpret its stated and implied requirements
- What issues to take into consideration when designing process piping
- Pressure design of piping and piping components
- How to analyze piping flexibility and gauge the limitations of piping and piping components
- Provide participants step by step approach to piping design, including the design optimization techniques.
- Introduce participants with various material selection, fabrication, erection and testing of piping systems.
- Be able to understand the mandatory requirements, specific prohibitions and optional stipulations given in the code and other service restrictions on piping systems.
- How to conduct and certify the pressure testing.
- Understand principles of piping integrity assessments as per API 572 and to make run-repair-replace decisions.
- Know how to calculate Remaining life, and MAWP of piping system.

Specially Designed for

Ideally suited for Piping engineers and designers, Plant engineers who need an understanding of the requirements for compliance to the Code for piping design and analysis, and Inspecting Managers, Engineers, Supervisors, and Plant operation personnel who work in the Refineries, Petrochemical plants, and other process industries will find this course immensely useful.
