**MATERIALS:** - We use a very high spec quality set of materials that are selected specifically for these types of print and applications. We use 3M, Avery, Harsco and Hexis branded products, these we have tried and tested on various projects and now have the experience to know their quality and longevity.

**LIFE OF MATERIALS:** - The life of our materials vary from project to project and process - Generally they have a manufacturers warranty of up to 5 years but can be expected to last up to 7+ years. They are all UV stable and all our printed materials are laminated for protection.

**APPLICATION TIME:** - The time it takes to apply the vinyl wrap to the vehicle varies from project to project however we estimate around 2-4 days depending on the final design and coverage.
